ENVIRONMENTAL COMPLIANCE TIP

Self Inspections

To ensure compliance, it is essential that all departments conduct self inspections of their areas. EH&S has developed **self-inspection checklists** to help with this evaluation. Go to the "Useful Resources" page at our website at <http://www.sunysb.edu/ehs/environmental/epa/links.shtml> and you will find checklists for:

- ✓ Laboratory / Hazardous Waste Satellite Accumulation Areas (SAA) Checklist
- ✓ Environmental Checklist for Offices and Administrative Areas
- ✓ Environmental Checklist for Shops, Maintenance and Construction Areas
- ✓ Environmental Self-Inspection Checklist (for general department operations)

These checklists will help you identify potential problem areas, give directions on proper procedures, and determine areas that need attention. If you perform an inspection and are unsure that you will be in compliance contact EH&S at 2-6410 for assistance.

Awareness promotes environmental stewardship... Involvement assures compliance.
