Volume 2, Issue 7

July 2006

NYSDOH/BERP inspection is @ 3 month(s) away – time flies when you are having fun. Let's stay prepared by always being ready for the unannounced State DOH inspection by reviewing the following:

- Always Wear protective clothing
 - Lab coats
 - Gloves (2 pair are a good idea)
- Wear eye protection
- Survey hands frequently during work, and change gloves as necessary
- Survey, as a minimum, hands, wrists, face, and shoes upon completion of activity
- After removing gloves, thoroughly wash hands using soap and water, before leaving the lab for any reason.
- Do not eat, drink, prepare food, apply cosmetics or smoke in any area where radioactive materials are used or stored, or where contamination may exist.
- Segregate pipetting devices used with radioactive materials from those used with non-radioactive materials
- Survey work surfaces after working with radioactive materials
- Segregate and dispose of radioactive materials in the designated containers (fill out RAM waste cards)
- Make sure your Radiation Logbook is up-to-date
- **Complete RPS Lab Self Audit >> mail back to RSO**

Safe Handling of Radioisotopes – continued

- DO NOT dispose of radioactive liquids in the sink WITHOUT permission from the Radiation Safety Office
- Store radioactive materials in covered containers, plainly identified and labeled with
 - Compound name
 - Radionuclide
 - Date
 - Activity
 - Radiation level, if appropriate
- **Radioactive materials must be under the positive control of the PI or authorized user at all times**
 - Lock lab when unattended, or
 - Lock refrigerator or freezer when unattended, or
 - Store in locked container when unattended
- Wear personal exposure monitoring devices (badges and rings) if issued to you.
- Report any lost or missing radioisotopes to the Radiation Safety Office immediately – 2-9674.
